

Interests and expectations

- Luxembourg welcomes this challenging initiative to develop a European small geostationary satellite platform
- Important support with a contribution of 10 M€
- Interest in both the platform development and mission sub-elements
- Believes that the close contact with customers, in particular operators, is an important factor of success
- Expectations go beyond the success of the first mission. Programme should lead to a competitive product to lead to a commercial success.

Luxembourg has interests in the following sub-elements

- System engineering
- Risk analysis and evaluation
- Satellite structure and interfaces
- Ground segment, in general
- In particular, Ground Control and Operation
- And, Telemetry, Telecommand and Ranging
