## Video: DLR Annual General Meeting and Science Show 2011

*24 November 2011*

The Annual General Meeting of the German Aerospace Center (DLR) took place on Wednesday, 23 November 2011 in Stuttgart. The evening event - an entertaining science show - is available here.

<http://www.youtube.com/embed/ARgblvwejwA>

The infotainment-style programme is a showcase as well as a review; it covers the research and development work carried out by DLR in 2011. This year, the focus is on DLR's facility in Stuttgart, which celebrates its fiftieth anniversary this year, and the research projects carried out there, such as laser-based space debris monitoring and integration of fuel cell technology in commercial aircraft (Elbasys).

Claus Kruesken presents the show in German.
